MNP

Obtaining the API keys from MNP

You can acquire the credentials needed to set up your plugin by contacting your account manager on MNP.

Installing the MNP Plugin

To add the MNP Plugin to your Channels account, kindly adhere to the following steps:

1. Access your account and go to the left side of the screen. Click the "Stores" button.
2. To edit an existing store, click the edit button on the right side. If you need to create a new store, click "+ ADD" above, name it, and use the edit button to make changes.
3. Go to the Plugins section and Click "+ ADD" to begin the installation.
4. A window will appear in the centre of the screen. Choose "MNP" from the list of available channels.
5. Provide the required information:
   - **Plugin Name:** Input a suitable name in the designated field. Select a meaningful name to you, possibly aligning with your store's name, for clarity in future order references.
   - **Client Code:** This is a unique identifier provided to you by the MNP platform upon registration or during the setup process. It is used to identify your specific account or client profile within their system.
   - **Customer Alias:** Input the alias or nickname for your customer profile on the MNP platform.
   - **Site ID:** Input the identifier that is specific to the site or platform instance you are integrating with MNP.
   - **Campaign Code:** Input the campaign code used to track campaigns within the MNP system.
   - **API Key:** Input the API key acquired from the MNP platform.
   - **Stock Management:**
     - **Add Products to MNP:**
       - Activate this function to synchronise your store products with MNP. Enabling it creates your store products within the MNP system.
       - For example, suppose you intend to retrieve products from a sales channel like TikTok and transfer the product data to MNP. In that case, you must initially activate the product download option from the sales channel. Subsequently, enable the "Add Products to MNP" option to ensure the products are first added to Channels. At this point, the system transmits the product data to MNP. Follow these steps precisely to ensure

the products are generated in MNP.

- **Download Products:** This feature can fetch product information from the MNP plugin and generate corresponding Store products. It also retrieves product quantities from MNP every 3 minutes, updating the plugin quantities accordingly.
- **Auto Sync Stock:** This functionality ensures that stock levels across all channels under the store linked to this plugin are regularly updated with quantities received from the MNP plugin every 3 minutes.

6. Once all fields are populated, finalise by selecting "Save" at the bottom right.
7. Activate the connection from the top of the screen using the "Is Active" button.

Congratulations! You've successfully set up MNP on Channels. Please visit **this page** to learn more about utilising MNP to the fullest.
